Skeie Quality

For generations, Skeie has been delivering high quality products to cinemas around the world, directly to end users.

Main markets are the Nordic countries, Northern Europe, British Isles and North America.

Unique know-how, continuous product development, quality, ergonomics and design have made us a leading provider of fixed seating solutions.

Skeie Sustainability

Skeie quality means products that last for years, with minimal maintenance.

Particularly noteworthy is the aspect of the LCC - Life Cycle Cost. Our products are an investment; if you include the low follow-up costs and the long life of our cinema seats, the desired balance is achieved through sustainability. For you, your company and your company values, this is the more economically favourable option in the long term.

We believe that quality and sustainability will be even more important for our customers in the future.

Unlimited Fabrics

Skeie Seating offers a large selection from reputable partners, in all price ranges.

We can supply both natural fabrics such as wool and leather, synthetic fabrics as well as blended fabrics.

Norwegian happy sheep

Norwegian Wool

a sustainable choice

High Quality

Norwegian wool is of very high quality. Some of the benefits:

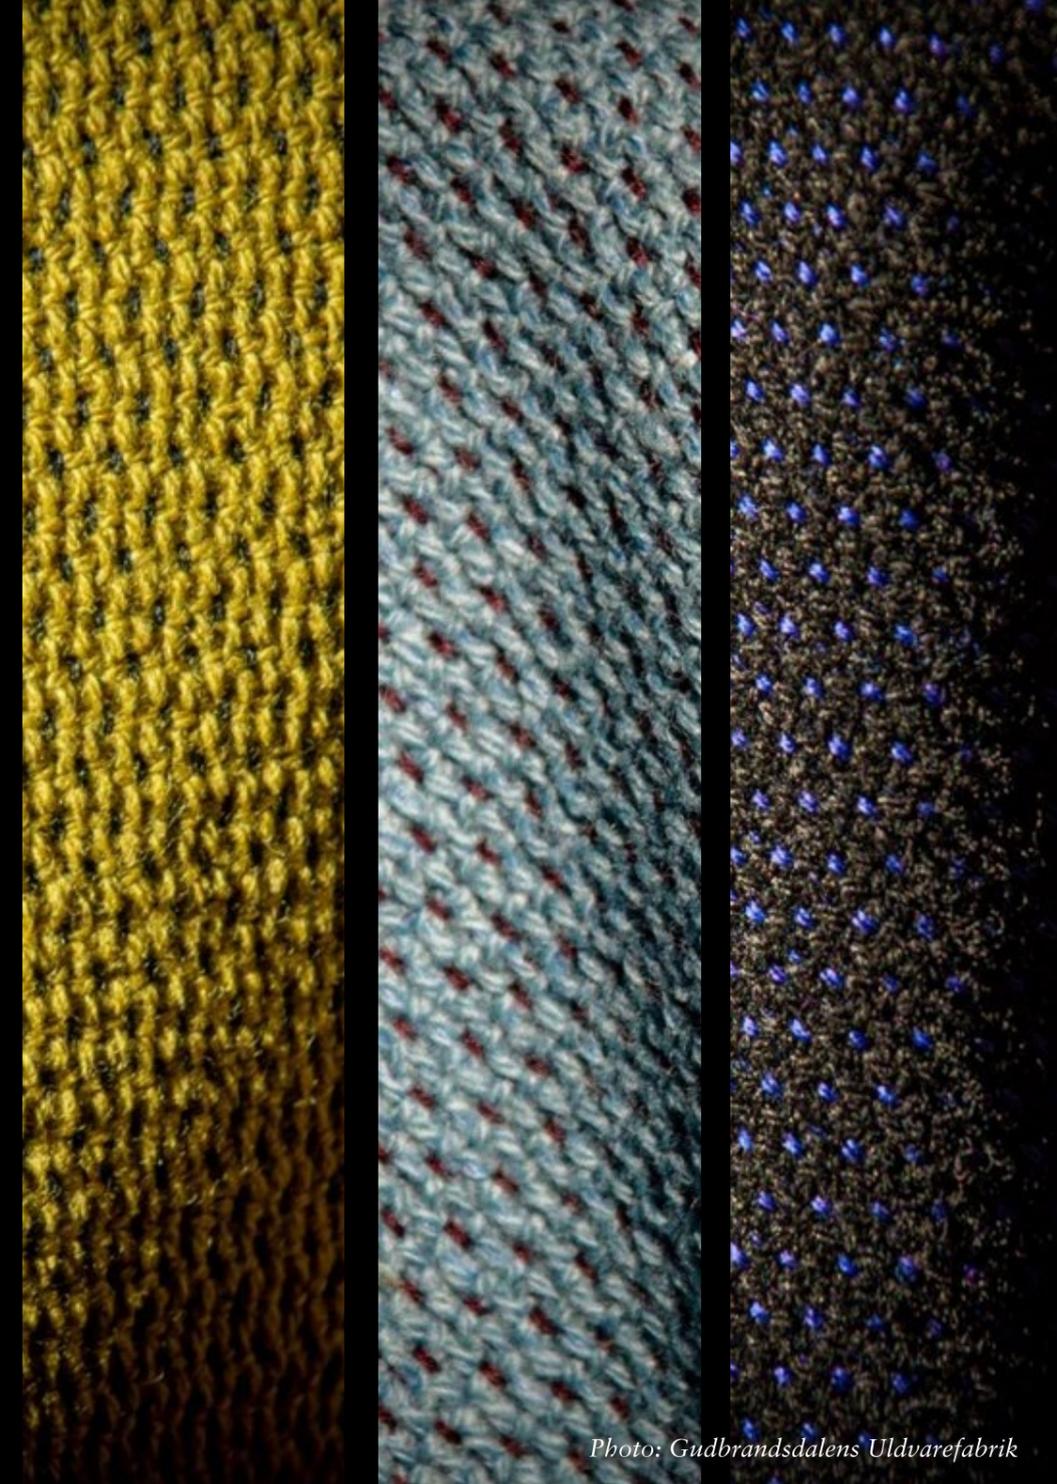

- 100% natural
- Self-cleaning and has antibacterial properties
- Elastic and holds well in shape
- Natural flame retardant
- Easy to clean and maintain
- Absorbs moisture
- Attracts little dust
- Noise-reducing fabrics

All Natural

Our cool climate means that the chemical treatment of the wool from the sheep is not relevant. The Norwegian sheep is grazing in outdoor areas where no kind of pesticides are used.

Sustainable

The products are environmentally certified with the European eco-label "EU-Ecolabel" (the "EU Flower") which corresponds to the Nordic "Svanemerket".

Skeie Seats & Accessories

In addition to our extensive standard products, Skeie offers individual solutions for different needs and budgets.

You can have the seats in different angles, heights, widths and styles. We can customize almost everything; extra high back, extra reclining function, fixed back, different size of armrests, wedge-shaped armrests, and more.

Our seats are adaptable for curved rows and sloped floor.

Nothing is impossible.

Skeie | Solist RECLINER
Goodbye Kansas Studios, Stockholm, Sweden

Atom RECLINER
The Reel Theatre, Ontario, USA

Skeie | Versatility

We can provide seating solutions for any type of room and style.

The maintenance-free gliding function of our seats ensures optimal seating comfort, thanks to the gliding backrest while the seat slides forward at the same time.

Our folding chairs (Tip-Up) require minimal space while providing good seating comfort. This is an advantage for narrow row depth.

The "rocker function" combines the benefits of a reclining back and a folding seat.
